

HARMONY STOOL

RODRIGO TORRES (2012)

DESCRIPTION

"Harmony" brings together chaos and order in a symbiotic relationship, rich in expressiveness, harmony and rhythm. Chaos allows us to enjoy an object that's "living" thanks to its changing appearance as the point of view shifts. Order is evident in the solid, expressive base structure and the soft, sophisticated and comfortable surface of the seat. A piece that is rich in memory yet bursting with innovation, both technological and expressive.
